Art Unit: 3753

1. This application has been examined. This action is in response to an amendment filed January 17, 2006. A restriction requirement was mailed December 13, 2005. Applicants' election of the claims of Group I without traverse is noted. Claims 47, 54-55, 65-66, 68-70, 87, 89 and 92-95 have been amended by applicants in an attempt to "...bring those claims within Group I, as well.". The amendments to the claims have, however, changed the inventions being claimed and in view of those amendments to the claims, a new election requirement is included below. Claims 1-96 are pending.

Restriction Requirement

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a regulated fluid system including a filter, classified in class 137, subclass 544+.
- II. Claims 22-65, and 87-96, drawn to a pressure regulator and method of using the same, classified in class 137, subclass 505+.
- III. Claims 66-86, drawn to valve including a cover, classified in class 137, subclass 377+.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions of the claims of Groups II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because combination is a regulated system breathed

by a human. The subcombination has separate utility such as pressure regulated fluid system.

The claims of Group II and III are related as combinations usable together. The claims of Group III have separate utility as a valve cover.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
